Work Experience

Virtuozzo *Jul 2025 – Sep* 2025
DevOps/ QA Intern

- Expanded C++ unit tests, enabled coverage flags, and integrated reports in SonarQube.
- Built Bitbucket Pipelines, automated SRPM/RPM packaging with rpmbuild/Koji, and published artifacts to Nexus.
- Hardened CI: parameterized branches and sonar-project.properties, fixed coverage path mismatches, and enforced PR/branch conventions.

rasdaman GmbH *July 2024 - Aug 2024*
Front-End Developer Intern

- Enhanced dashboard features for a scalable data processing engine.
- Built responsive web components with Angular and TypeScript.
- Implemented interactive visualizations using D3.js to support decision-making.

Projects

- Multilingual marketing site — Responsive site for a hosting provider with Next.js and Tailwind. Working on both frontend and backend. Integrated billmanger for payments. Delivered SEO-maximized SSR/ISR, deployed on Netlify with CI for demo and set up analytics, caching, accessibility checks, and error monitoring.

Education

Bachelor of Science in Computer Science (Minor in Economics & Data Science) *2021 - 2024*
Constructor University (formerly Jacobs University)

- Awarded a merit-based scholarship for academic excellence.
- Specialized in AI, robotics, cloud computing, and DevOps technologies.

Bishkek International School. *2013 - 2020*
International Baccalaureate Diploma Program (IBDP)

- Graduated with Leadership Award
